PADIGUARD - PITCH DECK 2026
Pest alerts for rice farmers, from one phone photo.

1. PROBLEM
Rice farmers in Southeast Asia lose 20-30% of their harvest to pests like brown planthopper. By the time they notice, it has already spread.

2. SOLUTION
A farmer snaps a photo of the rice leaf. Our AI spots early pest signs and sends a warning to every farmer nearby in Bahasa Indonesia.

3. TRACTION
- 1,200 farmers using PadiGuard in West Java
- 3 farmer cooperative partners
- 18% less crop loss in our pilot villages

4. TEAM
Budi Santoso (CEO) - agronomist, 5 years with farmer co-ops
Sari Wijaya (CTO) - ML engineer, ex-Gojek
2 full-time founders, based in Bandung, Indonesia.

5. BUSINESS MODEL
Free for farmers. Co-ops and agri-input sellers pay per region.

6. WHERE WE ARE GOING
Expanding to Malaysia and Vietnam in 2027 - both large rice markets.
We need a pilot partner with test farms in Malaysia.

7. THE ASK
Raising US$150,000 pre-seed.
Looking for: funding, mentors with agri-business experience, and a pilot partner in Malaysia.
